

Fjords Environmental Services

Chemical Registration

- Driven by OSPAR Offshore Chemical Notification Scheme (OCNS)

- **Fjords provides:**
- Regulatory consultancy support
- Ecotoxicology studies – acute & chronic
- Environmental fate studies – marine & freshwater
- GLP accreditation & ISO 9001:2015 compliance
- Training programmes

Whole Effluent Assessment

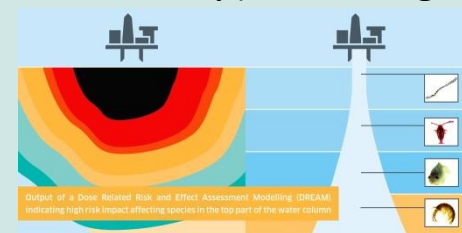

- Useful for evaluating
 - Performance of various chemical packages;
 - Separator efficiency;
 - Technology performance.

- Samples from:
 - Produced water;
 - Waste water;
 - Drill cuttings;
 - Decommissioning residues.

- **Fjords provides:**
- Toxicity profile to 3 trophic levels
- In-house supply of marine cultures, enabling delivery of excellent turn-around-times

Environmental modelling

- Driven by OSPAR and DECC recommendations, objective is to reduce risk of discharges to the environment.
- Fjords will build a risk map with specific location and environmental conditions
- Identify substances causing greatest harm
- Quantify the environmental benefits of any process changes

Tailored service provided to meet client's requirements

Unique expertise of ecotoxicologists, chemists & process engineers

Holistic package

Added value

Reduced cost
